Green Feet Enterprises LLC

Think outside the ruck!

S.E.I. brings experienced special operations warfighters in to help today’s units prepare for future threats in non- permissive environments. With a constantly changing battlespace it is imperative that you have the most current tactics, techniques and procedures at your disposal to ensure mission success and the return of your team.

“Working with today’s warfighter for tomorrow’s battlespace”

SDVOSB 8(a) Small Business specializing in coordinating and managing custom-crafted training courses for government and civilian agencies.

S.E.I. CAPABILITIES

(Green Feet Enterprises, LLC dba STOALS, Etc., SDVOSB 8(a) certified Co.)

MEDICAL

Tactical Combat Casualty Care (TCCC); First Aid, National Registry Paramedic Recertification; Basic Life Support (BLS); Advanced Cardiac Life Support (ACLS); Pediatric Life Support (PALS); Tactical Emergency Casualty Care (TECC); Etc.

MOUNTAINEERING

Extreme cold weather training; Patient Movement, Rope Rescue; Confined Space Rescue, Swift Water Rescue; Cave Access; High-Line utility; Etc.

TACTICAL

Weapons and Tactics Skills, Close Quarters Battle (CQB); Reactive Target Training; Ballistic Drills; Shoot/No-Shoot Scenarios; Urban Vertical Assault; SERE; OPE; Trade Craft;

PRODEV ACADEMY

Professional Development Training; Leadership Training; Mentorship Training; Communication Training; Project X; Military Decision-Making Process (MDMP); Operational Readiness; Operational Advancement; Military Speakers Bureau (MSB); Personality Trait Evaluation Instrument; Etc.

POTFF

Preservation Of The Force and Family; Couples Retreats; Morale Events; Resiliency; Youth Leadership and Resiliency Training; Etc.

COSTA RICA **NEW**

New S.E.I. International Training Site at Mirador Prendas Resort and Proving Grounds (Sarapiquí) 123.5 Acres of Tropical Forest; Biome-Specific Jungle Mobility Training; Waterborne Operations; Man-Tracking; Jungle Tactics; Survival; Horse/Pack Mules; etc.

S.E.I. CLINICAL ROTATIONS **NEW**

BOSTON: Pleased to offer 5-day Inner-city clinical rotations for Special Operations Combat Medics in Boston, MA; Emergency Department; Trauma surgery; Surgical; ICU; Operating Room; Anesthesia; Etc.

COSTA RICA: Pleased to offer 2-week ambulance and clinical rotations for Special **NEW** Operations Combat Medics in beaches of Santa Teresa, Costa Rica, in collaboration with LifeGuard Costa Rica, a Urgent Care Clinic founded in 2005; Etc.

MILITARY SPEAKERS BUREAU **NEW**

Subject Matter Experts from DoD, C-suite, professional sports, Darden School of Business, Wharton, Harvard Negotiation Project and in collaboration with the Leadership and Freedom Center offers mentorship and motivational speakers; Curricula and Mentorship; principles of commanding, coaching, and mentorship via public speaking, instruction and self-produced literature and media content; Etc.

ATLAS DEVICES **NEW**

S.E.I. an official trainer of Atlas Devices; Advanced Technologies in High Risk Access helping professionals work Higher, Faster, Safer; Auto-ascenders; Catapult; Magnetic Climbing System;

S.E.I. SOLUTIONS

SEI Solutions has provided customized training for Special Operations for over 20 years. Preparation for tomorrow's battlefields require challenging and forward-thinking training. Owned and operated by former Special Operations members, staff at SEI will ensure the customer gets exactly what they need.

- *VETTED INSTRUCTORS FROM THE SPECIAL OPERATIONS COMMUNITY AND INDUSTRY*
- *TRAINING AREAS AND MOBILE TRAINING AVAILABLE*
- *CUTTING EDGE TACTICS AND PROCEDURES*
- *TESTING AND VALIDATION SUPPORT*
- *CUSTOMIZED TRAINING*

S.E.I.
SOLUTIONS

PROFESSIONAL DEVELOPMENT (PRODEV) *In a space saturated with Leadership training PRODEV separates itself by:*

- *ACTIONABLE TECHNIQUES AND PROCEDURES*
- *EXPERIENTIAL TRAINING WITH FEEDBACK*
- *WORLD CLASS INSTRUCTORS AND INDUSTRY LEADERS*

Teams and individuals will work with experts to highlight and correct organizational challenges.

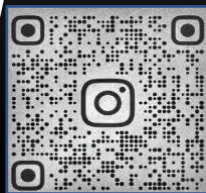

- *OPERATIONS SUPERVISOR COURSE*
- *GETTYSBURG, NEW HAMPSHIRE OR ON-SITE*
- *NEGOTIATIONS TRAINING*
- *BEHAVIORAL PSYCHOLOGY AND TEAM SELECTION*
- *CUSTOMIZED LEADERSHIP TRAINING*
- *CONSTITUTIONAL STUDIES*
- *INDIVIDUAL, TACTICAL AND STRATEGIC LEADERSHIP*

Fusion Innovation Cell

S.E.I.'s Fusion Innovation Cell

Spawned by the need for rapid military innovation, that at time may only be obtained within the civilian

sector...where bureaucracy bends to the will of \$\$\$ capitalism. **S.E.I.** now has a process to help military teams, organizations, and personnel struggling to get projects across the finish line, fulfill capability gaps, acquire needed and desired programs, curricula, and innovations for success. **S.E.I.'s Fusion Innovation Cell** has put the right Subject Matter Experts into a “cell,” flattening their lines of authority, money, and centralizing the chain of command: **Fusion Innovation Cell.**

This cell brings together DoD SMEs, industry experts, and institutions who collaborate on YOUR desired initiatives...no cost to you!

Small businesses, like **S.E.I.** having deep knowledge, networks, and capacity are encouraged to engage in Federal Research/Research and Development (R/R&D) in areas of expertise and/or within communities where impacts might be applied rapidly.

Help S.E.I. champion your initiatives by:

1. Identify a capability gap, problem, or initiative
2. Contact: tom.rich@seigreenfeet.com (702.556.8008) or ramiro.villalobos@seigreenfeet.com
3. Ensure Fusion Innovation Cell understands your issue
4. We'll take it from here...

Note: Potential projects will be adjudicated and prioritized by the S.E.I. Fusion Innovation Team

“ Think outside the ruck ” S.E.I.

ADVANCED CLINICAL ROTATIONS BOSTON, MA

Boston-area
based
clinical
rotation
for...
**Special
Operations
Combat Medics, through S.E.I.**

Now offered to appropriate medical personnel is an advanced clinical rotation at the South Shore Hospital Trauma Center. Together, S.E.I. and trauma surgeon Dr. Christopher Burns (former Navy SEAL platoon officer) is offering a comprehensive, multidisciplinary medical course for first responders and first providers. This concentrated program, which can be modified for a 2-day or even 2-week rotation, offers one-on-one experiences in anesthesia, surgery, emergency medicine, and critical care, to improve best practices and perform procedures that fall within the scope of SOCM practice.

This unique training environment provides exposure to hands-on training in TCCC principles, Prolonged Field Care fundamentals, and offers real-world training for combatants tasked with managing the combat wounded or critically ill in austere environments. The clinical course, which builds upon knowledge, skills, and abilities already learned in other courses, provides further development in advanced airway management, expands upon operative and surgical techniques in live human tissue from Harvard surgeons, increases your knowledge of cutting edge and innovative bedside ER and ICU care, and improves your management and acute decision making for critically ill patients.

It is recommended that medical personnel have basic abilities in endotracheal intubations, in addition to familiarity with soft tissue handling and suturing techniques. Furthermore, rotating military service members are encouraged to be comfortable with the placement of peripheral IV's and Foley catheters, and be able to obtain 12-lead EKG's and have other essential SOCM bedside skills. The in-depth course also provides encouraging supervision for skills that need improvement, and includes formal medical lectures to complement the rotation. Please note, this program requires dedication to the medical and surgical care of extremely ill U.S. citizens along with the hospital team, as this is not an observation rotation. This is an NREMT-recognized CEU certified S.E.I. program.

Information available at S.E.I. <https://sei-nh.com/curriculum/medical/clinical-rotations-boston-massachusetts/> or you can reach Tom Rich my Operations Supervisor at tom.rich@seigreenfeet.com or at 702-556-8008 or Ryan Mueller 9798.618.3006 pmed611@gmail.com

“Think outside the ruck”

Boston, MA

Description Continued.

S.E.I., in collaboration with South Shore Hospital (SSH), an American College of Surgeons (ACS) verified Level II Trauma center located just south of Boston MA, is pleased to offer clinical rotations for Special Operations Combat Medics (SOCM). Led by Dr Chris Burns, a critical-care/trauma surgeon and former Navy SEAL who prior to joining SSH was a staff surgeon at the Brooke Army Medical Center and Walter Reed National Military Medical Center, this program covers the entire continuum of care and provides hands-on practical training in multiple disciplines relevant to the combat medic. Under the guidance of trauma surgeons, attending-level ED and ICU physicians, and emergency nursing staff at South Shore Hospital.

“ Think outside the ruck ” S.E.I.

Rotations last in duration from 2-14 days, and are based on the medic’s availability. During these rotations, medics work one on one with SSH staff to learn best practices and perform procedures that fall within the scope of SOCM practice. This provides exposure to and hands-on training in many TCCC principles and Prolonged Field Care fundamentals, offering real-world training for battlefield medics tasked with managing the combat wounded or critically ill in austere environments. This is an NREMT-recognized CEU certified S.E.I. program.

NGB/RESERVE JUSTIFICATION MEMORANDUM

Green Feet Enterprises (dba S.E.I.) Exceeds Congressional DoD mandates for CERFP, NGHRF, CCMRF, and other National Guard and Reserves medical conversion/readiness requirements.

Joint training minimize the civilian-military operational gaps in the event of a catastrophic incident. or scenario where both entities might be asked to respond in support of one another. National Guard and Reserves are encouraged to continue pursuing state-of-the-art trauma training with these civilian partners, thus maintaining unit medical readiness postures at optimum levels as military healthcare providers or in garrison in support of emergency incidents on the homeland.

S.E.I.'s STOALS covers emergency canine, dental, psychological health, and civilian-based advanced trauma expertise gained through integrated partners like Tufts Anatomical Program, South Shore Health System (Boston), and both State/National mountain park services (Mt. Washington, NH and Teton County SAR, Jackson Hole) responsible for civil SAR in remote locations. S.E.I. STOALS no matter the location uses agreed-upon curricula and standards to replicate professional education recognized by the highest authorities, and with an emphasis on joint.

Tufts University is an international leader in innovative medical education. Consistently ranked among the top in the nation, the School of Medicine is affiliated with six major teaching hospitals and more than 30 health care facilities. Tufts University constitutes an invaluable and indispensable component of medical education and research. Each year, Tufts teaches medical and dental students, postgraduate physicians, and many other DoD professionals.

S.E.I./Tufts curriculum include a cadaver block conducted in the new light-filled, state-of- the-art Michael Jaharis Anatomy Laboratory—The lab has computer screens at every table, updated ventilation and lighting systems, and dedicated changing areas and locker rooms. An adjacent Technology Enabled Active Learning classroom, based on a design by MIT, has room for up to sixty students to work at stations set up for interacting with each other and their instructor.

S.E.I./South Shore MOU allows operators while in attendance at STOALS or attending a S.E.I. Boston ride-along rotation to participate in a professional emergency medicine and clinical internship program, which will allow the medics to maintain and further their expertise by providing hands-on “experiential” training and observations for patient care in emergency trauma care, clinical environments, and ancillary supportive services as supervised by the licensed professional staff of SOUTH SHORE HEALTH SYSTEM. This joint curricula provides these SOF medics, while in S.E.I. attendance to and designated by

S.E.I. , opportunities for medical education and training through a clinically oriented program of learning through hands-on experiences, clinical observations, and mentoring in emergency medicine, trauma care, clinical evaluation, and diagnostic follow-up.

Man Tracking

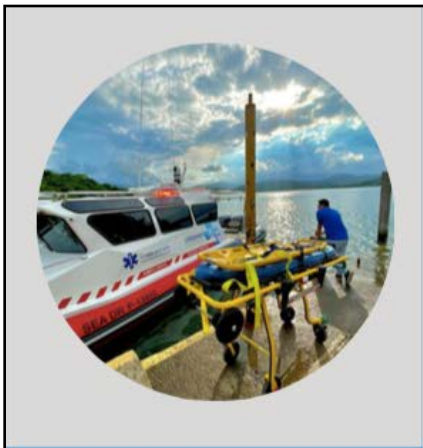

S.E.I. C.R – THE TRAINING STARTS HERE

Dense vegetation can limit lines of sight and arcs of fire, but can also provide ample opportunity for camouflage and plenty of material with which to build fortifications.

Jungle terrain, often without good roads, can be inaccessible to vehicles and so makes logistical supply and transport difficult to deploy armored forces, or any other kind of forces, on a large scale, which in turn places a premium on air mobility. The problems of transport make engineering resources important as they are needed to improve roads, build bridges and airfields, and improve water supplies. Jungle environments can also be inherently unhealthy, with various tropical diseases that have to be prevented or treated by medical services.

As an environment Costa Rica is suitable for biome-specific jungle mobility training, waterborne operations, combat man-tracking, jungle tactics, survival training, etc. Moving you from fighting to thriving in the jungle.

TRAIN IN COSTA RICA

On the beaches of Santa Teresa, Costa Rica, S.E.I. in collaboration with LifeGuard Costa Rica, a Urgent Care Clinic founded in 2005, is pleased to offer Clinic Rotations under the guidance of physicians and paramedics english spoken of the area. The program covers the entire continuum of care in emergencies and provides hands-on training in multiple disciplines relevant to combat medicine and rescue in the beach and jungle environment.

International Clinic Rotations

"Think outside the ruck" S.E.I.

- 🌐 sei-nh.com
- ✉ tom.rich@seigreenfeet.com

WHY US?

Founded in 1995, S.E.I. has become an industry leader in providing training in diverse operational techniques and certifications around the globe, providing a means of advanced life support measures in areas where medical personnel capability is limited. S.E.I. helps prepare operators and team members for any obstacles or conditions to complete any mission safely. We offer:

- More than 20 years of instructional experience in the area.
- Our staff is composed of recognized specialists and qualified instructors.
- Our methodology has been proven and provided to thousands of students to prepare them for combat medicine and emergency care.

LifeGuard Costa Rica for 18 years had the experience providing:

- Healthcare for our patients.
- Emergency Response Service.
- Water and Jungle Rescue.
- Medical Evacuations by: boat, helicopter, plane or ground.
- Five Advance Life Support Ambulances.
- Five Urgent Care Clinics, two of them at Santa Teresa Beach.

WHY SANTA TERESA BEACH?

Because it has the perfect combination of jungle and sea in one location, thus it is a popular tourist destination for folks from all over the world. As it is remote, around six hours to the nearest hospital, stabilizing and transporting a patient is a challenge. No doubt, your skills, medical and rescue knowledge will be put into practice. Another reason are the Extreme Sports that tourist participate in, like Surfing, Zip Lines, or Recreational Activities like venturing to close to slippery Water Falls, Horse Riding or ATV adventures in the jungle. These activities sometimes sadly end in an accidents that not only necessitate medical intervention, but also a creative mind on how exactly to execute the **RESCUE**.

S.E.I. Costa Rica

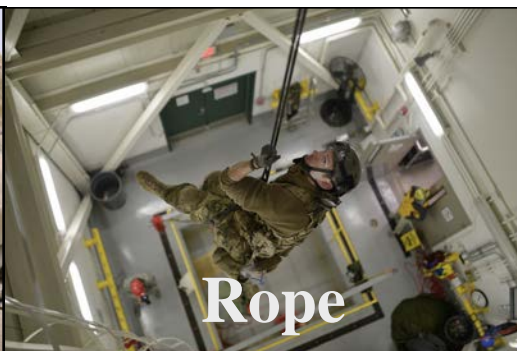

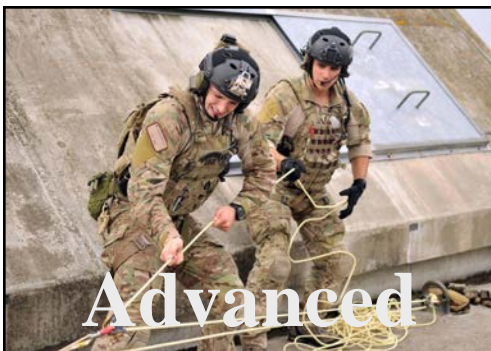

S.E.I. Mountaineering and Technical Climbing

S.E.I. is known for its vital ability to deliver the minimalist training methods for mountaineering and technical rescue. Our philosophy is specifically tailored for SOF personnel, and our fundamental understanding of the customer allows S.E.I. to provide the continuity of these concepts (*Combat Legos*) as courses and instructor cadre evolve.

* Refreshing individual and team rope movement techniques for safe and efficient use in adverse terrain including equipment selection, access and maneuver techniques, and skills repetition

* Refreshing 4 basic Mountain Rescue Functions: Rappel, Ascent, Lowers, and Raises

<https://sei-nh.com/curriculum/mountaineering/>

- * Refreshing and practice for minimum manned survivor access and movement in adverse terrain
- * Developing * *minimalist foundation* in order to provide base line for determining min force critical rescue tasks, equipment, and techniques to prep operators to handle improvised and limited resource environments

S.E.I. & Atlas Devices vBSS

training combines DOD, Civilian, and International experiences to produce the most aggressive and relevant techniques in boarding. We train operators to reach some of the highest, fastest, and most difficult targets in the world's most unforgiving maritime environments.

The Vertical Assault Climbing training focuses on techniques for rapidly gaining the high ground in a n y environment.

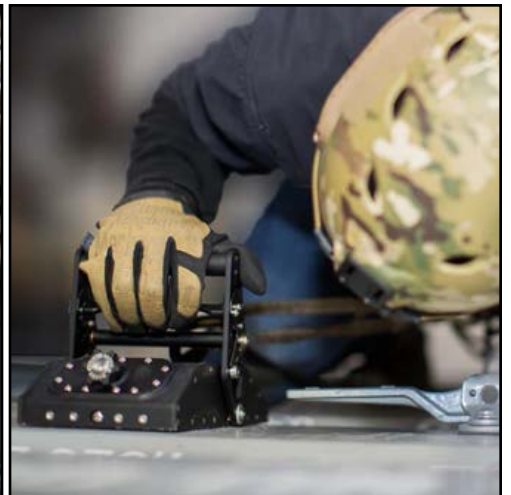

Atlas pushes the envelope on speed of access using a mix of traditional best practices and new technology.

The silent killers that are confined spaces

require critical training to recognize, operate in, and conduct your missions safely by enabling freedom of maneuver and reduction of operational risk. Confined spaces exist worldwide and warrant deliberate attention on training unlike traditional access methods.

S.E.I.-Atlas provide unique training methods/solutions to gain immediate responsiveness to confined space problem sets.
